

# Controversy over the U.S President George W. Bush

What makes him look like the worst President in the world heres the truth and information that will sort out why.

WARNING: These are not personal attacks against the president. This only brings out the truth why people don't like him so much

## Table Of Contents:

Chapter1: September 11, 2001 and the 9/11 cover-up  
Chapter2: The Patriot Act  
Chapter3: The Iraq War  
Chapter4: The Child Online Protection Act and our privacy rights  
Chapter5: Guantanamo bay and Detainee Torture  
Chapter6: Abuse Of Power  
Chapter7: Gonzales and the !!!PORN WARS!!!  
Chapter8: The Peoples voting system was suspected as rigged  
Chapter9: Controversy over breast feeding policies

## Chapter1: September 11, 2001 and the 9/11 cover-up

On September 11, 2001 a plane hit one of the twin tower buildings in New York City, NY. Then a 2nd airplane hit the second tower then both towers collapsed to the ground shaking the ground of New York. Over 3,000 died in the 9/11 terrorist attacks. People and our government thought it was terrorists attacking the buildings and quickly tried to enact "The Patriot Act" later discussed in Chapter2 which lead to the War On Terrorism.

Some people suspected our own government or president of staging the 9/11 attacks including Alex Jones and his site called the prison planet ([www.prisonplanet.com](http://www.prisonplanet.com)). What lead to such accusations was the fact 2 planes perfectly hit the twin towers without missing a mark, then when the plane hit the pentagon there wasn't much damage for a plane to hit it, the fact the 2 buildings went down perfectly which would have meant they used explosions to bring down the buildings after the planes hit the buildings, and the fact the World Trade Center got insurance to cover terrorist attacks before 9/11 which meant they knew the terrorist attacks were going to happen and yet we weren't warned and let people die, now why would that happen. The people thinks it was Al-Qaeda that tried to attack America but some controversy over Osama Bin Laden was some people heard he was trained by the CIA and that's how he knew how to attack the buildings so well. So even if Alex Jones is wrong about explosives preset in the buildings or the remote controlled airplane to ram into the buildings you still wonder if the government was involved in the September 11 attacks like what if Osama was trained by the CIA, is he apart of a plot and that's why we never catch him.

## Chapter2: The Patriot Act

On September 11, 2001 after the terrorist attacks on the world trade center the president wanted this bill put through congress called "The Patriot Act" which got enacted after the September 11 attacks. The patriot act gives the president more executive powers to help aid in the combat against terrorism. Also the patriot act may lead to loss of human, civil and privacy rights and may make our Constitution not work.

There's also been controversy over this act about stuff like spying on peace groups, searching through peoples Library records, medical records, financial records, computer and telephone conversations, and may even spy on your internet activities even if you haven't committed a crime. So that's when the Controversy over the Patriot Act started right after the fact the government can spy on you without a court warrant, or a court order.

## Chapter3: The Iraq War

After 9/11 the president started sending troops to Afghanistan to start fighting terrorists and then went to fight in Iraq later on, which is still going on today while I write this ebook/article. The whole controversy over the Iraq war is the fact it is going on for so long, the fact Kofi Annan spoke up against the President and resigned from the United Nations, the fact we already killed and hanged Saddam Hussein and yet we are still sending more and more troops to Iraq, and the fact it's becoming more and more a unpopular war.

The violence is getting worse in Iraq and the news was saying something about "A Civil War" in Iraq and more controversy over the war is when the democrats got in the Senate and tried to set a Timetable for withdrawal of troops the president Vetoed the bill making the democrats give the president a blank check to keep the war going.

## Chapter4: The Child Online Protection Act and our privacy rights

After president Bush became president and Alberto Gonzales became our Attorney General he and our president wanted to enact a new controversial act called "The Child Online Protection Act" which means families can sue any website owner if they feel any pages content is questionable or offending to that person or family. Also the COPA act restricts minors from looking at any questionable content such as porn, urban dictionaries, any websites with cursing, simple nudity, nudist/nudism websites, and any websites containing sexual content such as sex education websites and information about gays. Anybody that accesses any of that information could be breaking the law and could possibly go to court, thus the controversy over the COPA Act is the fact Americas youth, minors, and the people could be controlled by this act and take away our freedom of speech just because some persecutor can claim any content to be offensive at

their discretion.

## Chapter5: Guantanamo bay and Detainee Torture

Also After 9/11 there were stories about secret torture prisons and a place called Guantanamo bay tortured detainees and terrorist suspects. Some claimed they were chained to the ceiling, some claimed they went through water boarding torture, some others claimed they had to be naked with a little paper bag to cover their private parts, and some torture documents grabbed by the ACLU claimed the guards threatened to rape the persons wife or mother if that person did not talk and said he was a terrorist whether he was or not.

Also Guantanamo bay is in Cuba near the coast and also where Michael Moore wanted to get medical attention to 9/11 rescue workers.

There's also been some suicides at Guantanamo bay which may also give a clue to how bad they are being tortured and beaten just to get a "yes I am a terrorist" answer from the detainees.

Some people that went through water boarding said they were scared of the water after what they went through.

The president admitted after finding out about torture prisons that he ran secret CIA prisons.

## Chapter6: Abuse Of Power

The ACLU and some people believe there is "Abuse Of Power" in our government system. The government can now break as many laws as they want to, they can do anything they want without the "majority rules" system which democracy promises us, the police can search our homes or computers without a court warrant, you are a terrorist if the president claims you are, one president controls the laws and the authorities and can veto any bill that the democrats pass as long as he deems the bill as bad.

Since the time of The Nixon Administration the government wanted to spy on the American people but when Bush got to be president spying became a bigger priority even on the internet where any internet user can get any content at fast speeds.

Another "Abuse Of Power" the president has committed is the fact you can be arrested or tortured over secret evidence that you don't even know about without a court order and the government can run secret searches on any Americans homes or offices.

## Chapter7: Gonzales and the !!!PORN WARS!!!

Alberto Gonzales is our 80th United States Attorney General and another controversial character in the Bush Administrations attempts to stop terrorism and tighten law and order.

One of the controversies is he wanted the government to force all ISPs and online services to keep track of every single Americans internet/email/IM/Server activities to aid in Child Porn Investigations but the ACLU and privacy groups claim it is a violation of our privacy rights and may be against the U.S Constitution that was made to protect Americans rights and keep government checks and balances.

What is controversial over this anti-child-porn act is it can be used to prosecute illegal music downloaders, File-Sharers, and people that look at moral but controversial or offensive content.

Some also claim the child-porn laws are to attack regular pornography under the excuse of protecting children.

Also he isn't the only guy who wanted to get data on the American people. There was also a attempt by the Bush Administration to force all search engines to turn over all search records to the government to revive the controversial COPA Act and make content filters better and stronger. Also many privacy advocates and watchdogs where scared where this was going but then Google fought against the government subpoena forcing them to turn over search engine logs but in the end they had to supply a sample of some search requests so in the end the Bush Administration won the battle.

## Chapter8: The Peoples voting system was suspected as rigged

When Bush was elected as president a lot of people where believing the voting elections were rigged. Therefore I decided to put a list below on how many reasons why the elections of 2000 where rigged by George W Bush.

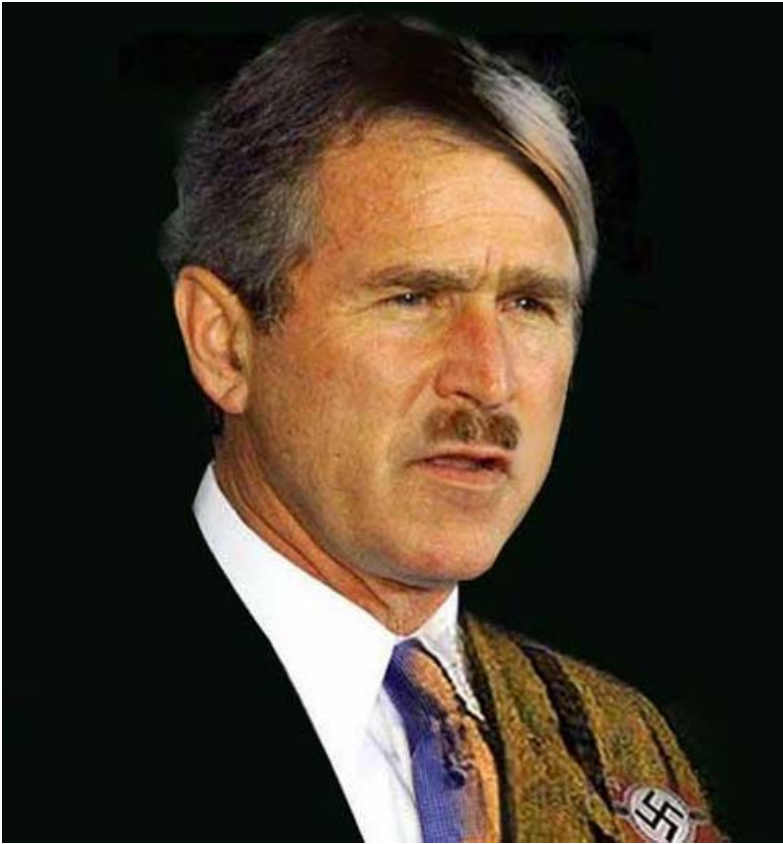

1. His brother was the governor of Florida
2. His first cousin worked at fox news at the time he got elected
3. The chairman of Bush's campaign is also the vote count women
4. There may also be voting discrimination against people of certain colors

5. Electronic Voting can be easily hacked or rigged with hacking tools or a hidden programmed backdoor

Michael Moore revealed that the voting results could have been rigged on Fahrenheit 9/11 a documentary about the president, about 9/11 terrorist attacks, and about the Patriot Act.

Also another reason the people believed he cheated the elections was also that people were like “John Kerry is gonna Win!!!” and then to hear Bush has been reelected for his second term and there were even stories and rumors saying that Bush may even have a **Third Term** to be our President. He may become the first president to even have a third term and the first president in History to destroy our Constitutional rights.

Some people even compared him to Hitler, some thought he's just as bad as Nixon, and his approval rating went down so he's not the most popular president

a image of Bush looking almost like Hitler

In fact some claimed he was the Antichrist and that his name (George W Bush) totaled up to 666.

## Chapter9: Controversy over breast feeding policies

An art of a women breast feeding and the black boxes represent censorship of breast feeding your baby in public.

Now after 9/11 you are restricted to what you can and cannot take on an airplane. So women could not let babies drink baby formula onboard so they breast feed their babies as a alternative to baby formula and then a article was found on MSNBC saying "Woman kicked off plane for breast-feeding baby. So now there are policies or possibly laws against breastfeeding in public because it might be considered sexual but breastfeeding is natural and is not sexual and babies need their mothers milk until they are older but ever since President Bush's law and order crackdown our rights and breastfeeding rights have been seriously damaged.

So there you have it all the controversy and images about the President out into 1 ebook and if there's anything I left out don't email me cause I am an anonymous author. Just put your opinion in the comments of any Bittorrent site or ebook site this ebook is hosted on and believe me I will see it and make a 2<sup>nd</sup> ebook the people's way.

I am glad for writing all the controversy and stuff about The President and maybe all this will be in the History Books about this country in the future. Maybe Bush will be considered the worst president in America.

I hope you all enjoy this ebook.

**COPYRIGHT NOTICE:** I also written this and made it all by myself so it's not copied work except the images. All images are by their copyright owners, and some images were taken from wikipedia.

If you think one of these images is a copyright violation and you want the DMCA to take it down I will in the next version of controversy about the president.
